DETAILED ACTION

1. According to paper filed on May 5, 2005, the applicants have canceled claims 3, 5 and 7-41 and furthermore, have amended claim 1.
2. Claims 1, 2, 4 and 6 are now pending in the application.

Response to Arguments

3. Applicant's arguments filed on May 5, 2005 have been fully considered but they are not persuasive regarding indefiniteness rejections. The applicants have amended claims to delete non-elected subject matter as well as to overcome prior art rejections. In regard to indefiniteness rejection, the examiner does not agree with the applicants arguments that these abbreviations are defined in the specification and therefore, need not to be defined in the claims. Why did they define variables Z, Ar and X in the claims since they are also defined in the specification on page 12? The claim language is critical and needs to be definite.

Conclusion

4. Rejection of claims 1, 2, 4 and 6 under 35 U.S.C. 112, second paragraph is maintained for the reasons of record.
5. The obviousness-type double patenting rejection is maintained for the reasons of record.
6. All prior art rejections are withdrawn in view of amendments and persuasive arguments.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. Claims 1, 2, 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldschmidt (J. Am. Chem. Soc.).

Goldschmidt discloses nine different compounds in table 1 on page 2941. All these nine compounds differ from the instant compounds of formula 50 that variable X represents Chlorine (Cl) or Bromine (Br) instead of Iodine (I). However, Cl, Br and I are all halogens and therefore, it would have been obvious to one skilled in the art to prepare the instant compounds by substituting Cl or Br with I. It is also of note that in the instant specification, all the preferred embodiments disclosed have variable X as Cl or Br (see page 13) and there is not even a single exemplified compound with variable X as I, OTf, OTs, ONf or OMs in the instant specification.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
